

Conifer Colorado 80433

Located in an exclusive 10+ acre private gated community in Conifer Colorado, this 7500+ square foot home is magnificently situated on a hillside of trees with fabulous views. The home was designed to incorporate the surrounding views from every room in the house. It is constructed with the latest super insulated technology, materials and electronics to provide state of the art energy efficiency and livability. The exterior is finished with materials designed to be minimal maintenance such as stucco, steel facia, vinyl soffits and trex decking with steel railings. Beautiful stone accents the entry.

Granite counter tops, slate, tile and birch hardwood floors accent the beauty and quality throughout. Custom maple cabinets are in many of the rooms with top of the line Grohe fixtures and Dacor, Bosh and GE appliances.

Garage

An 1120 square foot radiantly heated four car "finished" garage serves also as a workshop. The garage conveniently provides access to two levels of the house through an enclosed heated breezeway with separate entrance. A separate 1120 square foot finished area above the garage has its own bathroom and bedroom/storage area. It can serve as a large office space or an in-law apartment.

Utility/Electrical Info

The house is hot water heated by a combination of radiant lower level floors and a high velocity fan coil units on the upper floors which constantly bring in fresh air through a heat exchanger for energy efficiency. The high tech boiler can provide constant hot water.

The integrated electronic lighting and automation control is integrated into the audio, video, computer network, alarm and KEY telephone systems providing the ultimate living experience.
